## Global Presents

## 3.PRODUCT

It is the world of faux leather! The synthetic leather or artificial leather also named as rexine, vinyl, or leatherette has varied uses. This man-made fabric uses PVC or polyurethane that is treated and dyed so that it resembles near perfect to the real leather. Whereas the real leather is costly and not used due to ethical reasons, artificial leather is a perfect substitute that is way cheaper than the real leather and more versatile too.

Now, you need not worry about tanned animal hides, when you got the best PVC leather manufacturers in India. Arkom Leather LLP has steadily gained a position as the top among the PVC rexine cloth manufacturers in Gujarat. We have a processing capacity of 2 million meters of length per year. We provide customized solutions for PVC synthetic leather or artificial leather fabric. The shade, embossing pattern and the print are all open for customization as per the customer requirement.

Why we are the best PVC Rexine Manufacturers?

Over the years, Arkom Leather LLP has evolved and adapted new field trends driven by a passion to grow and succeed and thus gained importance as the superior PVC leather manufacturer. We are heavily invested in research & development, technical and stylistic innovation and experimentation with the new raw materials to produce PVC synthetic leather that score high on durability and quality.

Our manufactures PVC synthetic leather (artificial leather) has been used in varied sectors like-

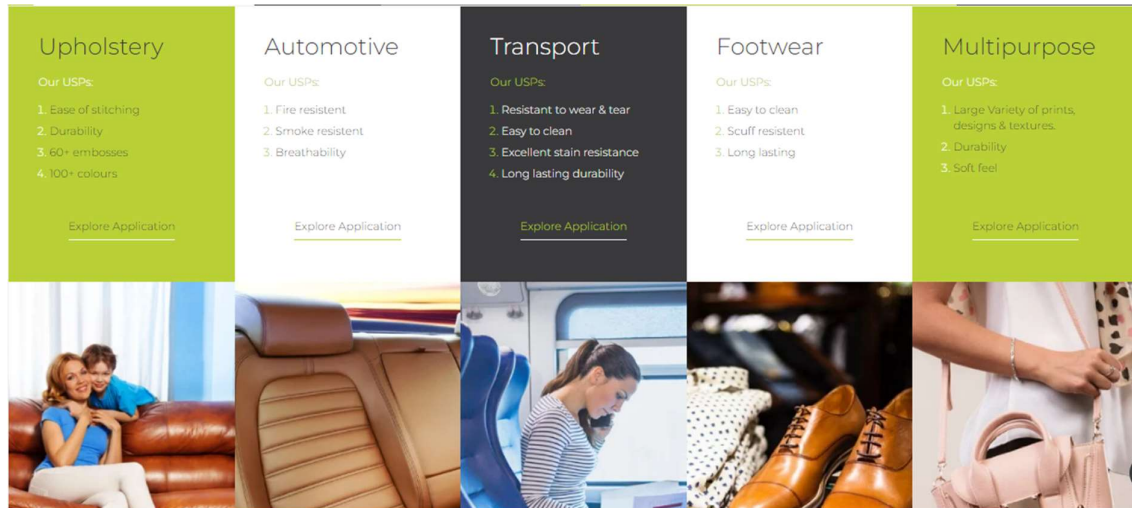

- Fashion
- Travel
- Footwear
- Stationery
- Utilities
- Furnishings
- Automobile
- Healthcare
- Education and many more.

We have a successful corporate model focused on the future and we have been able to become one of the leading PVC rexine manufacturers in India. We produce PVC synthetic leather that is used for several applications, from interior design and outdoor furniture to transportation field, from technical to luxury shoes to leather furnishings and apparel, to the marine and leather goods.

**ARKOM- PVC Leather Manufacturer You Can Count On**

At Arkom Leather, we have been producing and marketing PVC synthetic leather for a wide range of applications thus making us the leader PVC leather manufacturer. Our state-of-the-art infrastructure is divided into different departments from preparation, coating, finish and embossing to the testing of the finished product for quality control purposes. We have a specialized team of expert engineers who help us with the technological guidance for processing of PVC synthetic leather that is affordable, durable and superior in quality.

Arkomp Leather is the top among the PVC rexine manufacturers who specialize in making customized PVC synthetic leather as per the requirement of the customers. If you strongly support the use of artificial or faux leather, welcome to Arkomp Leather. We have a world full of beautiful PVC synthetic leather that feels real, is durable and affordable too. This is our full guarantee. Contact us today, PVC synthetic leather manufacturers in India.

‘Arkomp’ is very strict and adhered to the quality control and assurance. The quality control standards adopted by ‘Arkomp’ have broadened the horizons for its product. A team specially designed to closely monitor each stage of the process to reduce the wastages, defects and deviation in customer’s specification and requirement. Arkomp Group is now all set to have online process monitoring, record keeping, and maintaining.

### Manufacturing to International Standards

We embarked on our journey as a major supplier to OEMs and automobile sector; but over the years with extensive research and development capabilities, it has made its mark in fashion, footwear, furniture and upholstery and sports industries too.

Building upon the strengths of extensive market research and development capabilities we create products to international standards.

Today's marketplace demands innovation and the customers depend upon new products to enhance their business world-wide. Our R&D brings in that extra dimension in us that keeps us in the forefront in the artificial leather industry. Fully equipped with more than 60

different laboratory machines and seasoned personnel, our R&D capabilities keep us ahead of major players in this industry. New textures, colors, patterns, functionalities are created in our R&D Lab.

## **5.INSPECTION**

### **INSPECTION OF INCOMING MATERIAL**

Also called incoming inspection. It consists of checking and verifying all raw materials (chemicals, resins, plasticizers, pigments, substances, etc.) purchased. Our quality team then checks all incoming raw materials thoroughly and ensures that they are in order for further processing. If the raw material does not meet our standards, it will be rejected and sent back to the supplier. We have a fully equipped laboratory for testing and checking the incoming material, consisting of devices such as Brookfield Viscometers, Hydrometers, Grind meters, Karl Fischer Titrometers, Coater- Laboratory, bar coater, ovens, fabric yarn counters, tensile tester, etc.

### **ONLINE INSPECTION**

The online inspection consists of reviewing and approving the first part according to customer specifications and our internal specifications during production. It is an important step in ensuring that the raw material is adequate according to internal and external specifications. Colour, feel, weight, thickness, finish and all other mandatory requirements are verified before proceeding with further production. Tensile Tester, Vessel Gauge, Spectrophotometer, Bend Tester, Abrasion Tester, Thickness Gauge, Scales are some of the devices this laboratory uses for the control process.

## **6.CSR**

“With great power create with greater responsibility.”

Corporate social responsibility (CSR) is the idea that businesses should operate according to principles and policies that make a positive impact on society and the environment. Going beyond corporate philanthropy we have a well-developed CSR model. Situated in Gujarat, which is economically a Golden state in India, the value generation that we do through our CSR programs is commendable.

The whole organization is sensitive and dedicated to the vision of creating an organization whose name outlives its functioning. Natural resource conservation and CO2 emission regulation in the manufacturing process makes us a forward-looking organization, but what makes us stand out from other industries is the impeccable contribution made in CSR.

Through CSR, companies make decisions driven by financial gain and profitability, and the impact of their actions on their communities and the world at large. CSR goes beyond legal obligations: by voluntarily adopting ethical, sustainable and responsible business practices, companies seek to deliver benefits to consumers, shareholders, employees and society.
